Comfort Born of Craft

ABOUT US

Twins' story began in 2014 with the vision of people who brought together years of industry experience and sectoral expertise.

Seeing every space that people emotionally connect with as a living environment, Twins set out with the goal of producing designs that add value to all these spaces.

Twins concepts, showcased across Türkiye and around the world, reflect a production philosophy shaped by strong local manufacturing, a unique design language, and an inspiring approach to decoration. In line with this philosophy and values, Twins aims to become a global brand that sets the quality standards of Turkish furniture and moves forward with confident steps on this path.

The story of people who work with passion and always strive for better continues to grow and evolve every day with new goals — through its stores located in the centers where the heart of the furniture industry beats, and its 10,000 m² production facility.
